

Git

For project management

Tools Needed

- Git
- Github
- Github For Desktop
- Sublime Text or ATOM

Tools Needed – Git

Open Terminal.... Yuck but only for a second

From Finder

Click Applications in the Favorites list. Find the Utilities folder and click to open it. Locate **Terminal** and double-click the icon to open the program.

From Spotlight search

Search for keyword **Terminal**.

Type: **Git**

Click ok on the dialog to start the install

If it fails to install, download this installer...

<http://www.git-scm.com/download/mac>

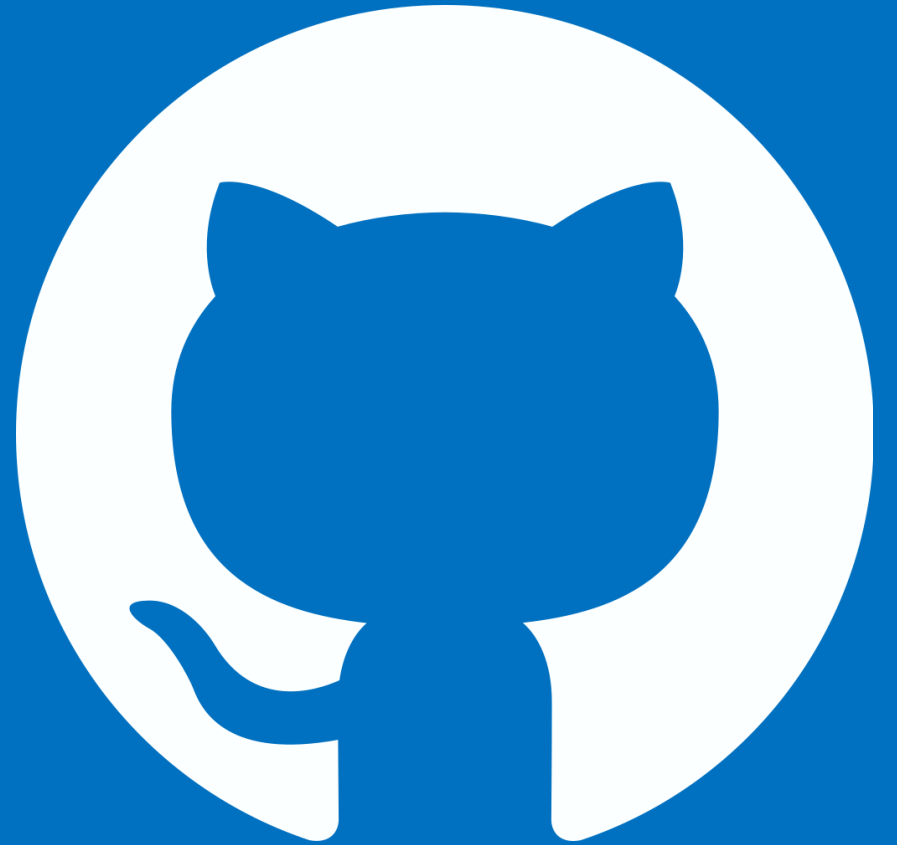

Tools Needed – All the Rest

- Github – <https://github.com>
- Github For Desktop – <https://desktop.github.com>
- Sublime Text - <http://www.sublimetext.com/3>

or

- ATOM - <https://atom.io/>
